PROFESSIONAL SUMMARY

Flutter Developer and Mobile Engineer with nearly four years of experience building and publishing cross-platform apps on Google Play and the App Store, including an e-commerce marketplace for Libya's largest online shopping platform. Skilled in Flutter/Dart, Clean Architecture, BLoC, REST APIs, WebSockets, Firebase, and CI/CD automation, with native Swift/SwiftUI and Kotlin/Jetpack Compose experience and Node.js backends. Creator of Flutter developer tools on pub.dev and BrickHub.

KEY ACHIEVEMENTS

- Published **5 production apps** on Google Play and the App Store (e-commerce, fleet, ride-hailing, social events)
- Reached **100K+ downloads** on baahy with **15,000+ products**, and **10K+ downloads** on the Ujra ride-hailing app
- Cut architecture setup time by **~70%** with Mason bricks that bootstrap new Flutter projects in one command

PROFESSIONAL EXPERIENCE

XenonApps, *App Developer* Aug 2024 - Present

- Shipped baahy, the Flutter app for Libya's largest online shopping platform, with a catalogue spanning hundreds of brands on Android and iOS
- Engineered Fleet for ITK Soluciones, a real-time app connecting drivers and fleet managers; replaced manual dispatch communication and gave managers a central dashboard for faster decisions
- Automated Android and iOS builds, signing, and store submission for Cotch Citi, a social events platform, with a Fastlane + GitHub Actions CI/CD pipeline

NextApp.is, *Mobile Developer (Remote, Part-Time)* Jul 2024 - Present

- Launched Loqtah for Al Mahad Real Estate, a property buying and renting app, delivering a responsive UI on Android and iOS from a single Flutter codebase
- Developed DigiERP, a cloud-based ERP and POS app covering 5 core modules (sales, inventory, purchasing, finance, reporting) for retail and multi-branch businesses
- Maintained code quality through structured code reviews and Clean Architecture practices

VLD Solution (Pvt) Ltd, *Flutter Developer* Sep 2023 - Aug 2024

- Integrated WebSocket connections, Google Maps, and secure payment processing into real-time ride-booking and multi-service apps
- Implemented Firebase-based live location tracking for seamless real-time rider and driver experiences

High On Cyber Pvt Ltd, *Junior Flutter Developer* Dec 2022 - Nov 2023

- Created healthcare, gaming, and business apps with real-time features and secure data handling
- Added in-app purchases and offline support so apps keep working in poor connectivity

OPEN-SOURCE PROJECTS

pagination_helper, *Flutter package, pub.dev* pub.dev/packages/pagination_helper

- Released a state-management-agnostic pagination package for lists and grids (offset, page, cursor) that works with Bloc, Provider, Riverpod, GetX, setState

mason_cli (mason_tdd), *Mason bricks, BrickHub* github.com/munawerdev/mason_cli

- Authored Mason bricks that generate Clean Architecture + Bloc projects with dependency injection and authentication in one command

PUBLISHED APPS (GOOGLE PLAY & APP STORE)

baahy, *E-commerce marketplace for Libya's largest online shopping platform* App Store

Fleet ITK, *Real-time fleet management app* App Store

Cotch Citi, *Social events platform* App Store

Karen Ruimy, *Spiritual coaching app with AI companion* App Store

Ujra, *Ride-hailing app with live driver tracking* App Store

SKILLS

Mobile Development: Flutter, Dart, Swift, SwiftUI, Kotlin, Jetpack Compose, Android, iOS, cross-platform development, responsive UI
Architecture & State Management: Clean Architecture, BLoC/Cubit, Provider, Riverpod, GetX, get_it, injectable, TDD, code reviews
Backend, APIs & Data: Node.js, REST API integration, WebSockets, Dio, MongoDB, PostgreSQL, Firebase
DevOps & Release: CI/CD, GitHub Actions, Fastlane, Git, Google Play and App Store publishing, CLI development
Integrations: Google Maps, Agora video, payment processing, in-app purchases, offline support, live location tracking

EDUCATION

Virtual University, *BS, Computer Science* 2025
